Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians. AND make us in the fore front to sell the new technologies like we used to, not buy them from the Japanese, Chinese, Indians!

No bank wanted to fund nuclear....and, by the way, the citizens don't either!

Sincerely,

Cynthia Justice

As long as they can profit from the status quo, there is not much incentive to create new, cleaner alternatives. Your refusal to allow them to raise rates may be the motivation they need to do the right thing for their customers and for the environment.
